**MEAL MANAGER**

# MEAL MANAGER

## THE FULLY CENTRALISED CASHLESS CATERING SYSTEM

---

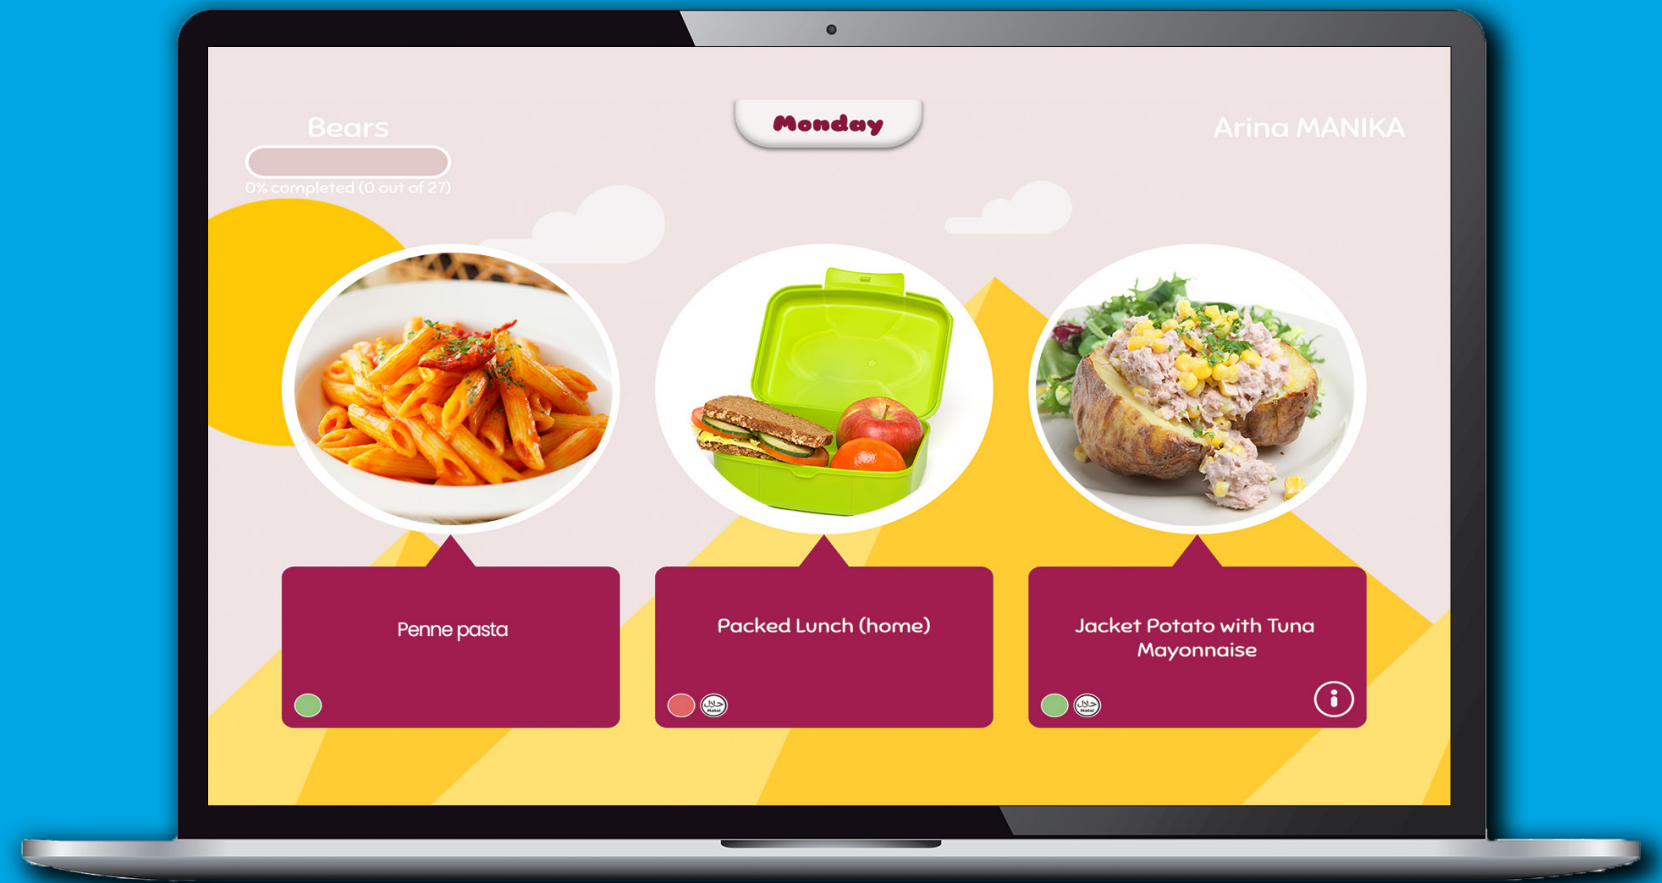

# INTUITIVE PAPERLESS MEAL SELECTION

Transform how you engage pupils in healthy food choices straight from the classroom and give parents autonomy over their children's school mealtimes. Our leading meal selection system not only encourages pupils to think about what they eat, but also provides practical improvements to your service from day one.

We know that managing menus across multiple sites can be a logistical nightmare. Meal Manager eases this burden by providing our caterers with the ability to centrally manage all menus across their sites, whether they have 1 or 500. The Meal Manager paperless solution brings all aspects of meal management online - no hardware installation is required and the software links directly with ParentPay and Schoolcomms online payment systems, offering a smooth and safe implementation pathway to caterers. Parents at home and students in classrooms can click a button and the order is in the kitchen, reducing waste, saving time and saving money.

A fully centralised and cloud based system, **Meal Manager** has the ability to revolutionise your meal pre-ordering service.

# SPECIALIST FEATURES DESIGNED FOR YOUR SITES

## Complete Cashless Catering System

Meal Manager utilises cashless payments through online systems such as ParentPay and Schoolcomms.

Our solution can be tailored to your needs. Whether you implement a debt limit or only allow meal bookings if there is credit available - Meal Selection gives you complete control of your debt management and significantly reduces the need for chasing debt.

## Online and in-class pre-orders

Meals can be pre-ordered up to 10 weeks in advance. This enables caterers to order in food according to demand, minimising wastage and generating accurate reports.

Meals can also be ordered in-class each morning. This provides an opportunity for increasing takeup. Caterers can personalise and combine these options to best suit their service.

## MIS Integration

We bring together both Meal and Attendance registration into one streamlined process, reducing the time it takes to pre-order meals and conduct the attendance register.

Meal Manager provides a system that is beneficial to the school, pupils and teachers alike, ensuring that systems implemented by the caterer have all round benefits.

## Allergen Control

Managing allergies and safeguarding is our main priority and Meal Selection lets caterers do this in an automated and streamlined process, reducing human error and therefore minimising risk.

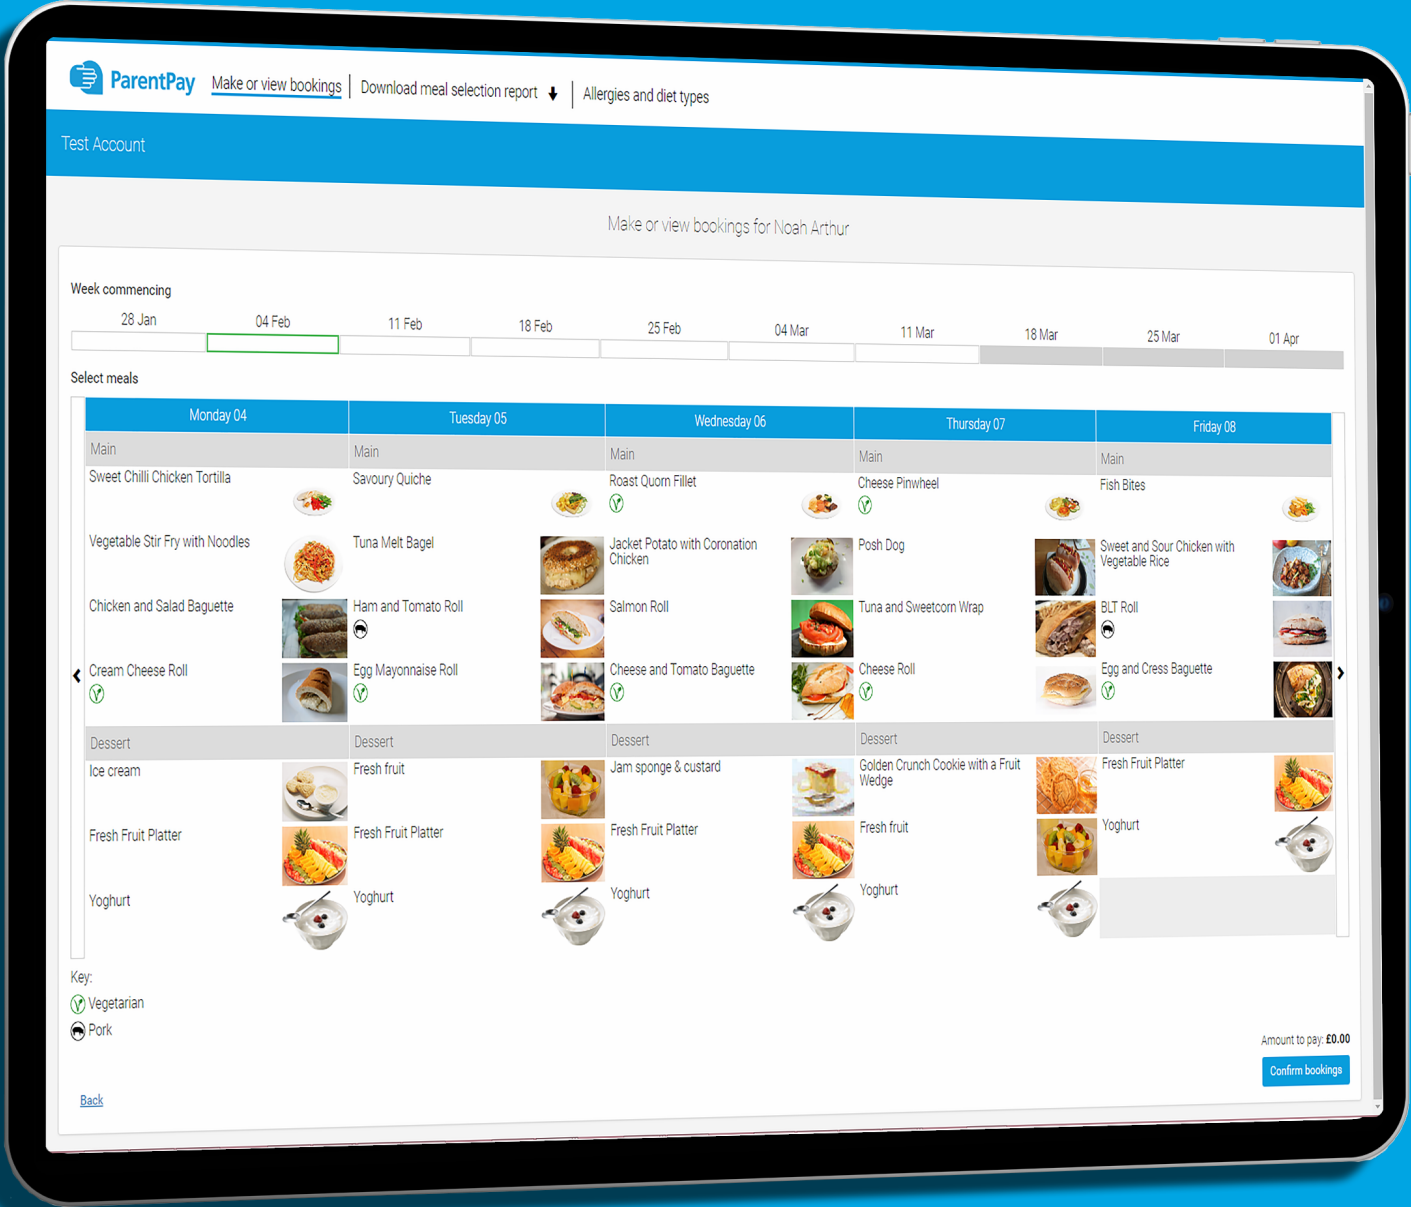

This also increases confidence for parents that they are selecting a meal that adheres to religious, cultural, dietary & allergy requirements.

.....

*“Many of our customers enjoy the benefit of the Meal Manager system, as this helps reduce paperwork and staffing hours. Our partnership gives our customers reassurance that we can offer a fully robust and reliable service”*

# STREAMLINE YOUR CATERING SERVICE

Complete visibility of meal pre-orders across sites is essential for caterers when managing stock, planning menus and ensuring nutritional balance. Software that assists with automating meal management will revolutionise your business.

The **Meal Manager** system offers total centralisation of administrative tasks; our cloud-based software allows for holistic reporting and instant aggregation of data across your estate, whether you need to check a single school’s meal numbers or analyse an instant paperless report of meal pre-orders across hundreds of sites. Parents can see an overview of the meals they have booked so they know what their children will be eating and on what day.

Food wastage can be drastically reduced; **Meal Manager** allows caterers to plan ahead and buy stock to meet the demand though online intuitive reporting.

**Meal Manager** offers caterers a one-stop-shop for paperless, centralised catering management, integrating with **Cypad Kitchen Manager** for complete visibility across meal pre-orders and kitchen processes.

# YOU'RE IN TRUSTED HANDS

We pride ourselves in providing comprehensive, online solutions to our customers - we're here to help.

From initial order to full implementation, our customers can trust that ParentPay is on hand to help, with our support team ready to answer your questions and queries.

ParentPay maintains and improves all in-product development for our solutions at no extra cost - no need to pay for every technical update once Meal Selection is in place.

What's more, our passionate project management team work around the clock to ensure our customers have everything they need for a smooth and simple solution implementation.

## Our mission

Our passion for catering remains at the heart of everything we do. We're always looking for new ways to make caterers' lives easier, create healthy meals and empower children to eat well.

## Our approach

Our agile approach ensures we tackle the industry's ever-evolving challenges head on. As a result, we continue to enhance the catering operations of over 9,000 sites across the UK.

## We're here to help

ParentPay's suite of apps not only helps school caterers to take on meal times, but also supports the UK's largest fast-food chains to audit efficiency and health & safety across their sites.

# GET IN TOUCH
