ParentPayGroup

medicaltracker

Where first-aid meets fewer forms and faster care.

Medical Tracker helps schools digitise first-aid and healthcare management by tracking incidents, accidents, medication administrations/use, first-aid qualifications and much more.

What does this mean for you?

Research from Medical Tracker shows that 92% of all inquiries are from schools looking to move from a functional process to a future-proof strategy. Committed to improving school healthcare management, Medical Tracker goes beyond offering a platform to log incidents to a tool that supports all school staff in reducing accidents and improving safety.

✓ Fully integrate Medical Tracker with Schoolcomms and SIMS

✓ Track expiring medication and staff qualifications

✓ Create reports and insights for injuries and accidents

✓ Manage access levels for each staff member, including midday supervisors and wrap-around care team members

✓ Get parent authorisation for medicines digitally

✓ Track mental health incidents, near misses and concerns

Medical Tracker is used by over

2,850+ schools

to record and monitor incidents and injuries

Monitor
first aid provision

Medical Tracker enables you to effortlessly monitor all on-site medication, track expiring medicines, and manage parental approvals securely online.

Improved parent and carer communication

Medical Tracker provides pre-populated, customisable emails that are automatically sent to parents, keeping them informed of any accidents, injuries, and the follow-up care for the pupil, which includes official NHS guidance.

Compliant
with GDPR and DfE

Medical Tracker ensures that schools and MATs stay fully compliant with statutory health guidance, ensuring the highest standard of care for students.

Centralised system

Syncing seamlessly with your MIS, Medical Tracker offers a central system for users to log, store and monitor every first-aid/medical incident. Standardising data entry and simplifying recording of incidents makes the platform a valuable tool for all staff regardless of digital skills.

Proactivity > Reactivity

Identify accident hotspots with location monitoring and incident frequency. Take a proactive approach and support your colleagues and students with an integrated approach to making school safe.

Intuitive
report creation

Easily generate detailed digital reports on injury type, frequency, location, and more. Export reports and share with senior leadership teams and school governors.
